DETAILED ACTION

Drawings

The drawings are objected to because the drawings are informal. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,043,988 (hereafter Kanai).

Kanai discloses, referring to figure 3A, circuit board comprising: a substrate (3) having an array of vias (61-68), the array of vias defining a set of channels on the substrate; and three bus traces (31, four shown) routed on the circuit board so as to enter a first channel belonging to the set of channels and to exit a second channel belonging to the set of channels, the first and second channels adjacent to each other so that there is one row (63) of vias between the first and second channels, wherein

Art Unit: 2827

each of the three bus traces are connected to a via belonging to the row of vias so as to define three connections.

Response to Arguments

Applicant's arguments with respect to claim 14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,339,220, granted to Chotard et al..
